Joe/Joanne, I have reviewed the above referenced document and approve the document for implementation. All the issues that I discussed on October 14, 2011 with Kris Carbonneau of AECOM, have been incorporated into the October 21, 2011 document. In addition, I spoke with Ron Gagnon and Margaret Bradley of the RIDEM and they do not expect to have any significant comments on the October 21, 2011 document. Please let me know how your discussions with the Army Corps of Engineers is progressing and when you expect to be in the field. Margaret Bradley and I will want to be on-site to view the sediment removal process.
